A Starry Tale at the University of Rhode Island Planetarium

at the

University of Rhode Island Planetarium on Friday, January 19 2018 at 6:00 P.M.

Contact: Francine Jackson: 401-527-5558

On Friday, January 19th, the University of Rhode Island Planetarium will present the program **A Starry Tale** at the University of Rhode Island Planetarium.

This planetarium program, a presentation of the Japanese optical company GOTO, is a beautiful introduction to sky mythology. Join us as we venture back in time to the gods and their interactions with the inhabitants of Earth, and their hope in our ability to live here in compassion and justice.

A Starry Tale, suitable for all ages, will be offered at 6:00 P.M. Admission is only \$5.00, to benefit the University of Rhode Island Planetarium fund. Friday, January 19th, at 6:00 P.M.

The University of Rhode Island Planetarium is located on the URI campus, on Upper College Road, across from the Visitor Center. It is available for school and other group presentations. For further information, please call Francine Jackson at 401-527-5558.

The program will include a short presentation of

Losing the Dark

why we all should do our best to keep the skies as dark as possible, then, after the main program, you will witness a live planetarium introduction to

The Skies of the URI campus

The University of Rhode Island Planetarium is available for programming for schools and other organizations.
