

Learn the History of Space Travel at the University of Rhode Island Planetarium!

University of Rhode Island Planetarium
Upper College Road
Kingston, RI

Saturday, July 22nd, 2017
6:00 P.M.

In July, 1969, the first footprints on another world were made on our neighbor Moon. To honor this historic event, the University of Rhode Island Planetarium will show **Dawn of the Space Age**, taking us from the first successful Sputnik mission to the hoped-for expeditions to Mars. Often considered one of the greatest planetarium shows ever made, Dawn of the Space Age will follow both the successes and the failings in our attempts to leave the Earth for other worlds. Join us and

Learn the History of Space Travel

on Saturday, July 22nd, at 6:00 P.M.

Also shown will be a short program on our increase in the use of lighting, and then

The Skies of the URI campus

a live introduction to the night sky.

Admission, to benefit the University of Rhode Island planetarium fund, is only \$5.00.

The University of Rhode Island Planetarium is located on Upper College Road, on the Kingston campus, across from 95 Upper College, the former University Club.

The University of Rhode Island Planetarium is available for programming for schools and other organizations. For more information please contact Francine Jackson at 401-527-5558.
