

Come to the

University of Rhode Island Planetarium

on Friday, March 10th, 2017

at 6:00 P.M.

to see

Two Small Pieces of Glass

The telescope introduced the sky as had never been seen. It showed that some objects were not point sources, but actual bodies: planets, star clusters, and, eventually, independent galaxies. Join the URI Planetarium as we learn the history of this very important tool that opened our eyes to new worlds of our celestial sphere.

This program, for the general audience, will be preceded by a short program,

Losing the Dark

on light trespass, and then will be followed by a live presentation of

The Sky above the URI campus

an introduction to the night sky.

Admission is only \$5.00, to benefit the University of Rhode Island memorial fund.

The University of Rhode Island Planetarium is located on Upper College Road, on the Kingston campus, across from 95 Upper College, the former University Club.

The University of Rhode Island Planetarium is available for programs of many varied topics of astronomical interest for all age levels. For more information please call 401-527-5558.
